EDUCATION

University of Alberta

Bachelor of Science, Computer Science, Minor in Economics

Edmonton, AB

Sep 2021 – Apr 2026

TECHNICAL SKILLS

Full-Stack Development: React, Next.js, TypeScript, JavaScript, Node.js, Python, Java, REST APIs, FastAPI

AI & Machine Learning: Retrieval-Augmented Generation (RAG), Vector Embeddings, SAP AI Core, SAP Generative AI Hub, Scikit-learn, TensorFlow, PyTorch

Software Engineering & DevOps: Git, GitHub, Testing, Code Reviews, CI/CD Workflows, Agile Development

Databases & Cloud: PostgreSQL, Supabase, Firebase Firestore, SQLite, AWS

Data & Analytics: SQL, Pandas, NumPy, SciPy, Power BI

PROFESSIONAL EXPERIENCE

Jack.org

Remote

Data Analyst & Web Developer, Volunteer Project [[Live Demo](#)]

Apr 2026 – Jun 2026

- Developed and deployed a mental health resource finder that captures user responses and applies structured **filtering logic** to connect users with relevant support services.
- Designed application logic and **organized resource data** to transform user inputs into targeted recommendations, supporting a consistent and **user-focused** digital experience.

University of Alberta

Edmonton, AB

Full Stack Software Engineer, Client Capstone Project [[Live Demo](#)]

Jan 2026 – Apr 2026

- Assisted in developing PromptED, an AI-powered teaching platform for a client in a **7-member Agile team**, translating **stakeholder** requirements into **68 user stories** and **35 MVP features** to support classroom discussion planning, live participation, and instructor decision making.
- Helped implement **retrieval-augmented generation (RAG) using vector embeddings** to retrieve relevant lesson content and provide contextual information for AI-generated classroom prompts.
- Developed, tested, and debugged full-stack functionality using **Next.js, React, PostgreSQL, GitHub**, and **CI/CD workflows**, resolving application issues and contributing to reliable delivery across five Agile sprints.

Ace Vegetation

Nisku, AB

Vegetation Management Technician

May 2024 – Sep 2024

- Entered, updated, and **verified client-site records, treatment data**, and field documentation, **maintaining accurate digital records** for reporting and operational tracking.
- Managed work orders, safety forms, and service documents **across 100+ client sites**, supporting **organized data workflows**, documentation accuracy, and team coordination.

AI & CLOUD CERTIFICATIONS

- SAP Certified Associate** - SAP Generative AI Developer (C_AIG) - SAP
- AWS Certified Cloud Practitioner** - Amazon Web Services

Sep 2026 - Sep 2027

Aug 2026 – Aug 2029

TECHNICAL EXPERIENCE

Event Lottery System App

- Developed a **Java Android event lottery app** in a team environment, replacing first-come, first-served signup with lottery-based registration for high-demand events.
- Integrated **Firebase Firestore, Firebase Storage, and Google Maps API** to support real-time event data, poster uploads, waitlist management, entrant mapping, notifications, and status tracking.

Stock Portfolio Optimizer [[GitHub](#)]

- Built a Python portfolio analytics pipeline using **Pandas, Numpy, Scikit-learn, and Scipy** to engineer features, **train forecasting models, optimize allocations**, and back test performance across multi-year stock data.
- Created **Streamlit** and **Power BI dashboards** with CSV/Excel reporting outputs and **PostgreSQL ready SQL** schemas to visualize allocation, predictions, and portfolio performance.
