EDUCATION

University of Alberta

Bachelor of Science, Computer Science, Minor in Economics

Edmonton, AB

Sep 2021 – Apr 2026

- Relevant Coursework: Software Process and Product Management, Reinforcement Learning, Machine Learning I, Computational Cryptography, Responsible Data Science and Artificial Intelligence, Digital Image Processing

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, TypeScript, HTML, CSS, SQL, R, Swift

Software and Development Practices: Microsoft Office Suite, Agile Development, Sprint Planning, Testing, Debugging, Team Collaboration, Technical Documentation

Frameworks and Libraries: React, Next.js, FastAPI, Node.js, TensorFlow, PyTorch, Scikit-learn, Scipy, Pandas, Numpy

Databases, Tools and Platforms: MongoDB, SQLite, Firebase, Git, GitHub, Docker, Expo, Figma, Google Maps API, REST APIs, OpenAI API, CI/CD Workflows, Power BI

PROFESSIONAL EXPERIENCE

University of Alberta

Software Engineer

Edmonton, AB

Jan 2026 – Apr 2026

- Developed PromptED, an AI-powered teaching platform for a client in a 7-member Agile team, translating stakeholder requirements into 68 user stories and 35 MVP features to support classroom discussion planning, live participation, and instructor decision making.
- Engineered full-stack functionality using Next.js, React, Supabase/PostgreSQL, GitHub, CI/CD, and RAG-based AI prompt generation, contributing to reliable delivery across 5 Agile sprints with iterative feedback-based improvements.

Evernorth Foundation

Software Engineer

Vancouver, BC

Jan 2026 - Present

- Building a modern, responsive website redesign for a client as part of an Evernorth Foundation non-profit pilot project, focusing on accessibility, clear navigation, and senior-friendly usability.
- Collaborating with an Evernorth developer team to structure tasks, implement the website, and deliver a professional non-profit web solution with documented tech stack, team roles, and design decisions.

Ace Vegetation

Vegetation Management Technician

Nisku, AB

May 2024 – Sep 2024

- Entered, updated, and verified client-site records, treatment data, and field documentation, maintaining accurate digital records for reporting and operational tracking.
- Managed work orders, safety forms, and service documents across 100+ client sites, supporting organized data workflows, documentation accuracy, and team coordination.

TECHNICAL EXPERIENCE

Stock Portfolio Optimizer

- Built a Python portfolio analytics pipeline using Pandas, Numpy, Scikit-learn, and Scipy to engineer features, train forecasting models, optimize allocations, and back test performance across multi-year stock data.
- Created Streamlit and Power BI dashboards with CSV/Excel reporting outputs and PostgreSQL ready SQL schemas to visualize allocation, predictions, and portfolio performance.

Event Lottery System App

- Developed a Java Android event lottery app in a team environment, replacing first-come, first-served signup with lottery-based registration for high-demand events.
- Integrated Firebase Firestore, Firebase Storage, and Google Maps API to support real-time event data, poster uploads, waitlist management, entrant mapping, notifications, and status tracking.
